Capability Statement

I would like to introduce my capabilities and experience to your organization in the event that you have opportunities such as contract, coaching or training, now or in the future.

My main areas of interest are:

- Business and operations support management
- Logistics Systems (Demand and Supply Chain)
- Codification
- Configuration or change management
- Dependability management (reliability and maintainability)
- Maintenance management
- Spares management
- Through life cost and support programs

I have a Masters degree in Management from Monash University and Graduate Diploma in Management from RMIT. I also have the Certificate in Workplace Training and Assessment from Chisholm Institute. I am also a Certified Professional Logistician through SOLE – The International Society of Logistics. I was the first Australian to be CPL certified, and the only non-US President of the Society to date. Recently I was accepted for a research PhD with University of Western Australia to research the nature of maintenance and maintenance support.

I developed and teach a unit in reliability engineering with Monash University by distance education. I also taught project management for Chisholm Institute.

A summary of my work history is as follows:

- Self-employed consultant/contractor/trainer (since 1987)
- Data General Corporation (1.5 years)
- Royal Australian Air Force (20 years)
- Southern Cross Machinery (3 years)

A summary of my collective work experience is:

- Checklists
- Codification & cataloguing
- Configuration management
- Logistics & product support
- Maintenance and maintenance management
- Process reviews
- Project management
- Reliability & Maintainability
- Safety, risk and system integrity
- Software sales, development and support
- Spares management

Delivered through:

- Task performance
- Training
- Coaching & Mentoring
